**DETAILED ACTION**

***Claim Objections***

1. Claims 4-23 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only and/or cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-23 have not been further treated on the merits.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1 and 3, the phrase "such as" and "in particular" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim 2 is rejected because it depends from a rejected claim 1.

***Claim Rejections - 35 USC §§ 102 and 103***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent Number 4,932,705 (Miller).

Regarding claim 1, Figure 1 of Miller shows a flexible tailgate 1 corresponding to the recited net. The flexible sheet includes slits 20 that are considered to provide holes and thereby a mesh structure to the tailgate. Also, see column 2, lines 16-39.

Regarding claim 2, Figure 1 further shows indicia 23 printed on the sheet. Also, see column 2, lines 37-39.

7. Claims 3/1 and 3/2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller as applied above.

Regarding claims 3/1 and 3/2, although Figure 1 shows rectangular holes, it would have been an obvious matter of design choice to make the Miller holes essentially square, since such a modification would have involved a mere change in the shape of a component. A change in shape is generally recognized as being within the level of ordinary skill in the art.
